## Leading Online Math Intervention Service Now Free

*Catchup Math provides its most popular secondary math programs at no cost*

### FOR IMMEDIATE RELEASE

**Berkeley, California – April 25, 2012** – Hotmath, Inc., the developer of the popular Catchup Math online math review and intervention service, today announced that it will allow schools and students to use its most popular basic math programs for free.

Catchup Math is a highly acclaimed online service that effectively diagnoses and fills in learning gaps for middle and high school students. Catchup Math's basic programs – Essentials and Foundations – cover math concepts through 7<sup>th</sup> grade and help struggling secondary students get caught up so they can succeed in math. These basic programs will now be available at no cost.

"Our mission at Hotmath for over 10 years has been to help struggling students in math, and this is the best way we know how to do it in these times of tight education budgets," said Chuck Grant, President of Hotmath, Inc. "We believe once teachers see how their students' math skills soar after using our basic math programs, they will want their students to advance into our Pre-Algebra, Algebra 1, Algebra 2, and Geometry programs."

Students can take quizzes that determine learning gaps and receive individualized instruction, or they can choose from the dozens of multi-modal basic math lessons that contain videos, activities, skill builders, math games and more. Teachers can generate detailed usage and progress reports that help them make informed instructional decisions.

"The timing of this offer couldn't be better," said Grant. "With schools having to eliminate summer school programs due to budget cuts, they now have a no-cost option for their failing students. We welcome all schools to take advantage of this incredible opportunity."

The free service contains no ads and will retain the privacy of users' contact information. Students and teachers can easily signup at [catchupmath.com](http://catchupmath.com) and begin using the basic programs immediately.

### ***About Hotmath, Inc.***

Hotmath, Inc. is the developer of the [Catchup Math](http://Catchup Math) ([catchupmath.com](http://catchupmath.com)) online review and remediation service for secondary mathematics. Established in 2000 by a dedicated team of math teachers, math professors, educators, and technology developers, Hotmath.com was developed to provide timely help to students struggling with mathematics. [Hotmath.com](http://Hotmath.com) is used in more than 10,000 schools and colleges nationwide for supplemental support. Catchup Math was introduced to meet the growing need for intervention to help overcome difficulties with algebra stemming from insufficient preparation and/or from a need for additional instruction on challenging concepts or skills. Catchup Math has been helping thousands of students in schools across the U.S. since 2009.
